Subject:	RE: Error in Automating BVT

Hi Nachiket,

   While I pulled down the updated code, I have seen that emailed notifications were still turned on some how, I have updated it and pushed the code back again. Please find the run log of build 102.

http://bamboo.navihealth.us:8085/browse/ENA-BVT-JOB1-102/log
and its not trying to send any emails now, hope this should work.

Subject: Error in Automating BVT

Sabitha/ Firoj/ Vijay/ Branden,

I disabled settings in Spritz to send an email and committed it to Bit Bucket.
Commit link -
https://bitbucket.navihealth.us/projects/ENTA/repos/bvt/commits/b7d1b7dac2ae25c57e645bf254eb9d4a925129f2#CI
TS/Projects/BVT/Settings/RunSettings.Properties

Spritz is still trying to send email. Can you please check what's the issue here? (I intend **not** to use Spritz email function,
I can utilize Bamboo's notification mechanism. Bamboo is robust and has better notification mechanism. Thus, I want to
disable Spritz email completely).
